## Computer System(s) Identification

Sensitive information (sensitive unclassified information) is information for which disclosure, loss, misuse, alteration, or destruction could adversely affect national security or governmental interests. National security interests are those unclassified matters that relate to the national defense or foreign relations of the U.S. Government. Governmental interest are those related, but not limited to the wide range of government or government-derived economic, human, financial, industrial, agriculture, technological, and law-enforcement information, as well as the privacy or confidentiality of personal or commercial proprietary information provided to the U.S. Government by its citizens.

Examples of sensitive information includes but is not necessarily limited to:

CRADA and patent information.

Medical records and personnel information such as social security numbers.

Proprietary research information; business sensitive information.
